

Press Release

OCTOBER 2014

New fuel efficient Comma oil for Ford EcoBoost engines

Cosan Lubricants has announced a new addition to its comprehensive range of Comma branded Performance Motor Oils –ECO-F 5W20. Specifically formulated for the latest generation of Ford EcoBoost fuel-saving petrol engines, ECO-F 5W20 is a high performance, fully synthetic engine oil meeting the requirements of ACEA A1/B1; API SN and is recommended by Comma for all applications requiring Ford M2C 948-B.

With the emphasis on fuel efficiency, the low viscosity of new Comma ECO-F 5W20 provides rapid oil flow on start-up. Its formulation uses highest quality base oil and the latest additive technology package to deliver outstanding protection against foaming, wear and corrosion in all Ford EcoBoost engines.

This new introduction follows Ford's latest sales figures revealing that its 1.0 litre Ecoboost turbocharged petrol engine now powers one in every five cars sold in Europe. In the UK this represents over 100,000 cars and vans.

ECO-F 5W20 is available week commencing 13th October 2014 in 5 litre pack sizes.

Compatibility is guaranteed when you fit by application at www.CommaOil.com
