## **Comma introduces new fuel-efficient Volvo engine oil**

There is no let-up in the regulatory pressure on vehicle manufacturers to make their engines more fuel-efficient and less polluting. A new generation of ultra-low viscosity, fully synthetic Comma Performance Motor Oils (PMO) are major enablers in meeting demanding EU targets and providing distributors with a comprehensive range of compliant products to meet every market requirement.

The new Comma Eco-V 0W-20 grade has been specially developed for enhanced fuel efficiency in the latest technology Volvo engines and is compatible with all applications requiring the Volvo VCC RBS0-2AE factory and service fill oil specification. Its fully synthetic formulation is predominantly for the 1.5 and 2.0 litre Volvo petrol and diesel engines from 2013 onwards with a VEA (Volvo Engine Architecture) Drive-E Powertrain. This makes Comma Eco-V 0W-20 suitable for some 20,000 Volvos already on UK roads, a number which will continue to grow with many future Volvo engines also requiring this engine oil specification.

Available immediately, new Comma Eco-V 0W-20 fully synthetic for Volvo is supplied in all convenient workshop pack sizes – 1L, 5L, 20L and 199L barrels – and supported by Comma's unique 100% Compatibility Guarantee.

Comma's industry-leading online VRN application data at [www.CommaOil.com](http://www.CommaOil.com) has been updated to accommodate the introduction of Eco-V 0W-20, which extends the Comma PMO portfolio to eighteen products, covering over 99% of vehicle applications for the entire UK passenger car and light commercial vehicle parc.
